

INTRODUCTION TO PRIMAVERA WEB (P6)

This course provides hands-on training for Primavera's Web-based business intelligence solution. Participants will create a project, create activities and relationships, customize activity views, assign resources, adjust the project plan to account for schedule delays and over allocated resources, and analyze portfolios. Participants also will customize dashboards. Hands-on workshops help students create and track an entire project to completion.

Learning Outcomes:

- Customize Personal and Project workspaces
- Manage a project from creation through initiation
- Analyze project schedule and assess resource over allocation
- View and approve timesheets from project resources
- Collaborate with project team members

Prerequisite: Fundamental Project Management Training and knowledge of Windows™

Course Length: 1 day

At the completion of this course the student will be able to:

- Describe Primavera modules
- Customize Personal Workspace
- Describe the Project Management Life Cycle
- Describe Enterprise Project Structure and Work Breakdown Structure
- Create a project
- Customize the Project Workspace and Workgroup
- Create a Work Breakdown Structure
- Add activities
- Create relationships
- Schedule the project
- Assign constraints
- Assign resources
- Optimize, execute, and analyze the project plan
- Initiate a project request
- Manage documents
- Creating and analyzing portfolios
